

## A-TAC (South African English and Afrikaans) – Gate Question Version

*Child & adolescent version : Kinder- en adolescентeweergawe*

This questionnaire is in particular detail focused on a number of abilities and behaviours in children. All children are different from one another. This means that their abilities in various areas as well as their conduct and behaviour vary a great deal.

To gain as complete a picture as possible of your child, we ask you to answer a considerable number of questions. Naturally, children function in different ways at different ages. State your perception of your child's functioning as compared to his or her peers. If your child has had a certain problem or specific characteristic during any period of life, answer the question with "Yes" even if the problem or characteristic is no longer present. If a statement is untrue for your child (even if just because the child is too young for it to apply), please mark "No".

Hierdie vraelys is in spesifieke detail gefokus op 'n aantal vermoëns en optredes in kinders. Alle kinders verskil van mekaar. Dit beteken dat hulle vermoëns op verskeie gebiede asook hul gedrag in 'n groot mate verskil.

Om so volledig moontlike oorsig van jou kind te kry, vra ons u om 'n groot getal {aantal} vrae te beantwoord. Uit die aard van die saak funksioneer kinders op verskillende maniere op verskillende ouerdomme. Vergelyk u persepsie van u kind se funksionering met sy/haar portuurgroep. As u kind 'n spesifieke probleem of spesifieke karaktereienskap gedurende enige lewenstydperk getoon het, beantwoord die vraag met "ja" selfs al is die probleem of karaktereienskap nie meer teenwoordig nie. As 'n verklaring vir u kind nie waar is nie (al is dit net omdat die kind te jonk is om van toepassing te wees), beantwoord dan met "Nee".
